

BLENDDED IP

Optimize your Internet connectivity by utilizing multiple Internet Service Providers (ISPs) instead of relying solely on one provider, ensuring both speed and reliability.

Benefits:

Simplicity

Blended IP takes the complexity out of routing.

5X Burstable

Supporting spikes in traffic without the bottlenecks.

Specifications

Flexible options.

Direct Support

Access to Network Engineers.

Highlights:

- ✓ 1G and 10G physical ports
- ✓ Burstable up to 5X
- ✓ Low latency Internet access for remote workers
- ✓ No single point of failure for dual homed ports

Take a Deeper Look:

Utilizes Multiple ISPs

- Fixed or burstable bandwidth

1 Gigabit & 10 Gigabit Ethernet ports

- Includes monthly cost for cross connect
- Copper (1G ports)
- Single mode fiber (1G - 10G ports)

Both IPv4 and IPv6 supported

- Complimentary /30 public IPv4 or IPv6 /48 addresses (additional IP address blocks available for a monthly fee)
